

MARIJUANA FACTS

AFFECTS ON THE BRAIN

THC has an impact on brain cells particularly those in circuits that control learning and memory, coordination, and addiction.

AFFECTS ON SELF CONTROL

Marijuana can have a significant impact on your coordination & perception of time, which can make activities like driving dangerous.

AFFECTS ON THE LUNGS

Marijuana smoke deposits four times more tar in the lungs and contains 50% to 70% more cancer-causing substances than tobacco smoke does.

PREVENT YOUTH MARIJUANA USE

PARENTS AND CAREGIVERS CAN HELP PREVENT YOUTH FROM USING MARIJUANA BY STARTING THE CONVERSATION AND MAKING SURE THEY ARE AWARE OF POTENTIAL CONSEQUENCES.

DID YOU KNOW?

Approximately 3 in 10 people who use marijuana have marijuana use disorder.

Developing marijuana use disorder is stronger in people who start using marijuana during youth or adolescence and people who use marijuana frequently.
